

HOT ROD
HIGH PERFORMANCE MOTOR OIL

PREVENTS ENGINE RUST AND CORROSION DURING STORAGE!

Results of 1,000 hour severe storage simulation

Joe Gibbs Driven Hot Rod Oil delivers unique benefits for your classic vehicle that no other oil delivers:

STORAGE PROTECTION

Uses the same oil additive technology developed for the U.S. Military for storing and shipping their combat equipment. Protects against rust and corrosion so your engine is protected even when it's not running.

HIGH ZINC CONTENT

Higher levels of Zinc (ZDDP) than regular passenger car oils. Delivers proper anti-wear protection for older style push-rod and flat-tappet engines.

CAMSHAFT WEAR PROTECTION

Superior camshaft wear protection chemistry. The same wear protection found in Joe Gibbs Driven Racing Oil which has powered Joe Gibbs Racing to multiple NASCAR Championships.

CONVENTIONAL PETROLEUM OR SYNTHETIC FORMULAS

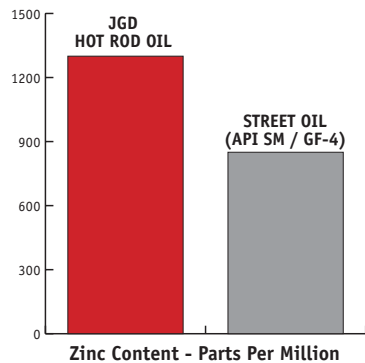

Our synthetic formula provides improved cold-start protection, and our conventional formula delivers lower cost cam and rust protection in a mineral based oil.

WHY HOT ROD OIL?

Modern API certified oils are designed to protect emissions control equipment like catalytic converters. Joe Gibbs Driven Hot Rod Oil is designed to protect your camshaft and critical engine parts of older style engines. With high levels of ZDDP to protect your engine, Joe Gibbs Driven Hot Rod Oil delivers the chemistry that classic cars, muscle cars and historic racers need. Because these cars are not typically daily drivers, Joe Gibbs Driven Hot Rod Oil also delivers storage protection additives to guard your engine from rust and corrosion. These additives also prevent dry starts. Developed specifically for older cars, no other oil provides this unique combination of lubricant chemistry.

When your car sits in the garage over the winter, Joe Gibbs Driven Hot Rod Oil fights corrosive wear and rust. When you fire the engine up, Joe Gibbs Driven Hot Rod Oil protects your engine from excessive cold start wear. When you put the pedal to the floor, Joe Gibbs Driven Hot Rod Oil protects your camshaft from scuffing. No other oil provides this level of protection in the garage, at start-up and on the road. No other oil protects your vehicle like Joe Gibbs Driven Hot Rod Oil.

ANTI-WEAR PROTECTION

Joe Gibbs Driven Hot Rod Oil has higher Zinc content for better protection.

WHAT IS JOE GIBBS DRIVEN?

Ten years ago, Joe Gibbs Racing created Joe Gibbs Driven Racing Oil to solve the flat-tappet wear issues they experienced in their NASCAR Sprint Cup Series engines. Countless hours of dyno testing and thousands of miles of competition were spent perfecting the Joe Gibbs Driven Racing Oil formula.

In 2005, Joe Gibbs Racing decided to start selling the same formula racing oil used in every JGR race car to other racers. Today, hundreds of engine builders in the United States and on 4 different continents use Joe Gibbs Driven Racing Oil to make more power, lower operating temperatures, and provide the wear protection to make it to the finish line.

In 2007, it became clear that the flat-tappet protection found in Joe Gibbs Driven Racing Oil also worked well in street driven push rod and flat tappet engines. However, these older style engines used in hot rods, street rods, and muscle cars needed additional additives for storage and street driving. Joe Gibbs Driven Hot Rod Oil delivers the same lubricant technology used by the U.S. Military for storing and shipping that will protect an engine, even when it's not running. The Joe Gibbs Racing camshaft protection package combined with this military storage protection technology creates an oil unlike anything on the market. It protects your engine in the garage and on the street.

RECOMMENDED APPLICATIONS:

- Antique cars and frame off restorations
- Muscle cars
- Vintage import cars
- Street/Strip performance cars
- Vintage racers
- Marine V-8's
- "Crate" engines
- Non-OBDI

AVAILABLE IN:

Synthetic

10W-30 - Case of 12 Quarts - Part #01507

15W-50 - Case of 12 Quarts - Part #01607

Conventional

10W-30 - Case of 12 Quarts - Part #02007

15W-50 Case of 12 Quarts - Part #02107
